About me

I am more than just a developer. I stand out for my communication and leadership skills. My creative thinking allows me to effectively tackle challenges and design attractive and user-friendly websites and systems. My technical skills include Python, Php, JavaScript, C#.NET and Java as well as different libraries such as jQuery.

Experience

Grupo Bimbo, Internship

Oct 2023 to Dec 2023

- The human resources department of Grupo Bimbo needed a system to control job applications since they handled thousands of data in Excel, so I developed a system in Microsoft Power Platform that would allow them to enter participants through a form and facilitate their selection process.
- I was assigned tasks to automate processes in Excel from certain departments. I used Python with the Pandas library to get the data from the file and modify it.
- The Facilities department did not have any way for employees to report any incident within the facilities. I developed a system in Microsoft Power Platform, which allows to report incidents and attach evidence. The manager can see the pending, completed and in progress, which facilitates the search for incidents.
- Every day I had a meeting in Teams to see the progress, doubts and schedule meetings with other departments. For this reason, communication was very present.

Hospicio de Huerfanos de Cartago, Web Developer (COVAO Project)

Mar 2023 to Jul 2023

- As a student, Participate in the development of a web system for the photocopier of the "Hospicio de Huerfanos de Cartago". This system was developed in PHP, JavaScript, JQuery, HTML, CSS and Bootstrap.
- I was mainly involved in the design and development of the user interface, in which I greatly improved my JavaScript skills. I also performed different functions in the backend for the correct sending of files and requests from students to workers.
- I worked hard as a team. I was the team leader and the one in charge of getting the system out on time. I had a close communication with my colleagues through the Bitrix platform, in which I was in charge of assigning tasks and watching the development process. If a colleague needed help I worked as a team with him to get the task done.

Shipping and moving company, Web Developer

Apr 2024 to Jul 2024

- A shipping and transportation company needed a website where customers can interact and request services within the site. I worked as a frontend and backend developer. I used technologies such as Php, JavaScript, CSS, HTML and MySQL.
- I worked on sending emails, so that when customers fill out a form, when they hit send they are sent a copy of their answers and the administrator is sent the application, plus quick access to the customer's WhatsApp in case they need it.

Education

Universidad Fidélitas, Cybersecurity Engineering

2024 - Currently

- I have developed projects using Python. The most important was for an airline in which you could make flight reservations. I worked in a team and I was the team leader.
- I have participated in database analysis for different situations. For example, student enrollment and inventory.

INA, English by competencies

2024

- I worked hard on the development of soft skills such as communication, teamwork, problem solving, writing, time management.
- I usually did role-plays in which I had to be prepared on how to answer or ask questions, which improved my problem solving and assertive communication.

COVAO, Software Development

2021 - 2023

- I developed projects using technologies such as PHP, JavaScript, CSS, HTML, Bootstrap, jQuery, .NET, Java, WordPress and Python. As a result, I needed to swiftly adapt to new technologies that were unfamiliar to me at the time.
- I used .NET to develop a student enrollment system, where you could enroll, assign professors, and view student grades. It was also completely parameterizable. The interface was one of the most important aspects, as you needed a system that was easy to understand and eye-catching.
- I developed skills as a project leader. Proficient in database analysis and creation, ensuring functional and reliable solutions.
- I worked heavily on designing user experiences (UX) and user interfaces (UI) to be user-friendly and visually appealing. I mainly used Figma for the design of these. I gained knowledge in color theories, logos, symmetry and Photoshop.

Skills

- | | | |
|---------------------|-----------------------|-------------------------------------|
| • Fast Learner | • Problem Solving | • Object-Oriented Programming (OOP) |
| • Team player | • Communication | • User interface design |
| • Adaptability | • Time management | • Intermediate English |
| • Creative Thinking | • Attention to Detail | • Database Management (SQL/MySQL) |

Certifications

Network Defense

2024

- Cisco Networking Academy

Introduction to Cybersecurity

2024

- Cisco Networking Academy

Database with SQL

2023

- Ministerio de Ciencia, Innovación, Tecnología y Telecomunicaciones de Costa Rica

Python Essentials

2023

- Cisco Networking Academy

Digital Marketing Fundamentals

2022

- Google

SCRUM Foundation

2022

- CertiProf

IT Essentials

2021

- Cisco Networking Academy

Technologies

Languages: Php, JavaScript, Python, HTML, CSS, MySQL, SQLServer, JavaScript, Java, C#.NET

Software: Figma, WordPress, Git, GitHub, PowerApps, Microsoft Flow, SharePoint, PowerBI
